SURVEILLANCE CAMERA SYSTEMS

OKUDA SURVEILLANCE CAMERA INC.

Hiroshima, Japan

THE THRIFTY 35

THE THRIFTY-35 System has a micro computer built into the controller (CC-36), which permits independent control of up to 3 cameras with date display and automates all shooting operations after replacement of film.

FEATURES

- ★Extremely low cost : 3,500 continuous photos per roll of 35mm, 150foot film.
- ★Greatly reduced noise level-Super silent operation.
- ★One control box for up to three cameras separately and yet simultaneously controlled.
- ★Battery backed : Camera will continue to take up to 3,000 photos without electricity.
- ★Full data and time printed directly on each negative by the latest LED system.
- ★Number of photos desired is controllable for each individual camera (Suspicious Shooting).
- ★Emergency shooting set by timer to control shots taken and avoid running to film end.
- ★Interval shooting can be set from 0 to 98 minutes.
